Project Development Phase
Model Performance Test

Date	7 October 2026
Team ID	
Project Name	Script-Controlled ACL – Restrict Record Access Based on Field Value
Maximum Marks	

Model Performance Testing:

Project team shall fill the following information in model performance testing template.

S.No.	Parameter	Values	Screenshot
1.	Model Summary	ServiceNow script-controlled ACL setup to restrict record access based on a field value (e.g., Sensitivity = Confidential) using a record-level ACL script and a Script Include. Note: If the user is eligible (assigned user or privileged role) the record opens; otherwise the script returns false and access is denied.	[Add screenshot of the ACL record and script]
2.	Accuracy (Correct allow / deny decisions)	Expected: 100% of authorised users allowed and 100% of unauthorised users denied Actual: __ of __ test cases passed (fill after testing)	[Add screenshot of impersonation test results]
3.	Response Time	Target: record and list open in under 3 seconds with the ACL active Actual: __ seconds (fill after testing)	[Add screenshot of page load time / transaction log]
