Ideation Phase
Brainstorm & Idea Prioritization Template

Date	7 October 2026
Team ID	
Project Name	Script-Controlled ACL – Restrict Record Access Based on Field Value
Maximum Marks	4 Marks

Brainstorm & Idea Prioritization Template:

Brainstorming provides a free and open environment that encourages everyone within a team to participate in the creative thinking process that leads to problem solving. Prioritizing volume over value, out-of-the-box ideas are welcome and built upon, and all participants are encouraged to collaborate, helping each other develop a rich amount of creative solutions.

Use this template in your own brainstorming sessions so your team can unleash their imagination and start shaping concepts even if you're not sitting in the same room.

Step-1: Team Gathering, Collaboration and Select the Problem Statement

Item	Details
Project	Script-Controlled ACL – Restrict Record Access Based on Field Value
Selected problem statement	PS-1: Restrict access to records based on the value of a field, which role-based ACLs alone cannot do.
Goal	Create a script-controlled ACL that allows or denies access to a record depending on a field value and the logged-in user.
Team collaboration	Team members share ideas, discuss the ACL design and agree on the problem before listing ideas.

Step-2: Brainstorm, Idea Listing and Grouping

Group	Ideas
Access conditions	Idea 1: Allow access only if the Sensitivity field = Public Idea 2: Allow Confidential records only for the assigned user or caller Idea 3: Allow access based on the user's department matching the record's department
Script logic	Idea 4: Use an ACL script with gs.hasRole() and current.<field> checks Idea 5: Put the logic in a Script Include so it can be reused across ACLs

	Idea 6: Return answer = true / false with clear comments
Testing and audit	Idea 7: Test with impersonation of different users Idea 8: Log denied access in a custom log table Idea 9: Create a test-case checklist for each field value
User experience	Idea 10: Show a message when a record is restricted Idea 11: Hide restricted records from lists and reports

Step-3: Idea Prioritization

Idea	Description	Impact	Effort	Priority
Idea 2	Confidential records for assigned user / caller only	High	Low	1
Idea 4	ACL script using gs.hasRole() and field value checks	High	Low	2
Idea 5	Reusable Script Include for ACL logic	High	Medium	3
Idea 7	Test with impersonation of different users	Medium	Low	4
Idea 11	Hide restricted records from lists and reports	Medium	Medium	5
Idea 8	Log denied access in a custom table	Low	Medium	6
