Ideation Phase
Define the Problem Statements

Date	7 October 2026
Team ID	
Project Name	Script-Controlled ACL – Restrict Record Access Based on Field Value
Maximum Marks	2 Marks

Customer Problem Statement Template:

Create a problem statement to understand your customer's point of view. The Customer Problem Statement template helps you focus on what matters to create experiences people will love.

A well-articulated customer problem statement allows you and your team to find the ideal solution for the challenges your customers face. Throughout the process, you'll also be able to empathize with your customers, which helps you better understand how they perceive your product or service.

Example: Script-Controlled ACL – Restrict Record Access Based on Field Value

Problem Statement (PS)	I am (Customer)	I'm trying to	But	Because	Which makes me feel
PS-1	A ServiceNow administrator	Restrict access to records based on the value of a field (e.g., Confidential)	Role-based ACLs give access to every user holding the role	ACL conditions without a script cannot check the field value against the user	Worried about data leaks and non-compliance
PS-2	A security / compliance officer	Make sure only authorised users can read or edit sensitive records	I cannot easily prove who can access which record	Access logic is spread across roles, Business Rules and manual checks	Unsure and frustrated during audits

Problem Statement (PS)	Detailed Statement
PS-1	An administrator wants record-level access to depend on a field value, but standard role-

	based ACLs cannot do this, so sensitive data stays exposed.
PS-2	A compliance officer needs a single, testable, scripted ACL that clearly shows who may access a record and why.
